

KANHAINYA AGRAWAL

Software Development Engineer

Email: kanhaiaggarwal@gmail.com | Phone: +91 7877080746 LinkedIn: [kanhaiaggarwal](#) | GitHub: [KanhaiyaAggarwal556](#)

SUMMARY

Software Development Engineer with experience building scalable **SaaS applications** using **React, Node.js, and modern web architectures**. Strong foundation in **data structures**, system design fundamentals, and collaborative **Agile development**. Proven ability to debug production issues, write maintainable code, and ship features that impact real users at scale.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, HTML5, CSS3

Technologies: React.js, Zustand, Vue.js, Node.js, MongoDB, PostgreSQL, TailwindCSS, Responsive Design

Developer Tools & Practices: Git, GitHub, GraphQL, Hasura, Docker, REST APIs, VS Code, Postman

EDUCATION

Bachelor Of Technology(Information Technology)

Maharaja Agrasen Institute of Technology(MAIT), Delhi

CGPA - 8.6/10

Nov 2021 to June 2025

Course Work - Data Structure & Algorithms, Database Management System, Operating System

PROFESSIONAL EXPERIENCE

Frontend Developer

Oct 2025 - Jan 2026

FuelBuddy | Gurugram, India

- Engineered a time-series analytics dashboard using GraphQL queries to monitor On-Time Delivery (OTD) percentages and delivery performance metrics across 500+ daily orders, delivering actionable insights that optimized operational efficiency by approximately 10%.
- Implemented order reporting and export functionalities for carry-forward orders, streamlining handling of large datasets and increasing operational visibility and reporting accuracy by 25%.
- Enhanced dashboard usability by structuring order tables with pagination and real-time filtering capabilities, boosting order tracking effectiveness and user satisfaction by 80%.
- Utilized Vue.js, TypeScript, TailwindCSS, GraphQL, Docker, PostgreSQL, and Agile and AI-assisted development methodologies to deliver scalable, high-performance features.

Software Developer Intern

Feb 2025 - Jun 2025

Compro Technologies | New Delhi, India

- Contributing to development of large-scale e-learning platform serving 50,000+ university students within Agile team, participating in sprint planning and daily standups
- Developing responsive dashboard features and components using React.js and TypeScript, improving user engagement metrics by implementing intuitive UI/UX patterns

PROJECTS

Vimarsh - Full Stack Social Media Platform

[Live Demo](#) • [GitHub Repository](#)

Tech Stack: React.js, TypeScript, Node.js, Express.js, MongoDB, REST APIs, TailwindCSS,

- Built a secure, production-grade authentication system** using OAuth (Google, Facebook, LinkedIn), email-based OTP recovery, and JWT access/refresh tokens, enabling **10-day persistent login** while maintaining session security — directly addressing user friction and account trust issues.
- Designed a personalized content feed** that surfaces posts based on user interests, tags, and engagement signals, reducing information overload and improving content relevance — a core problem faced by modern social platforms.
- Implemented engagement-driven social features** including media-rich posts (images/videos), likes, comments, shares, followers, and related-post discovery, driving **higher user retention and interaction** instead of passive scrolling.
- Engineered a modern, responsive UI with infinite scrolling** and glassmorphism-based design, optimizing perceived performance and usability across devices — improving user experience and session duration.

ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming Excellence:** Solved 800+ problems across LeetCode(1674), CodeChef(1591), and HackerRank platforms (5★)
- Ranked 55th out of 16,000+ participants** in CodeChef START143D Contest, showcasing problem-solving speed and accuracy under time constraints
- Top 16 Finalist** at HackOverflow Hackathon, NIT Durgapur - Built innovative solution among 200+ participating teams
